

Nugget Markets Novato Corte and Woodland

Keeping it fresh for a growing food retailer

Nugget Markets is one of Northern California's premier natural and organic grocers with locations in the Sacramento area as well as Marin and Sonoma County. The distinctive look and feel of its stores has always been a key differentiating factor for Nugget.

NORR provided extensive architectural and interior design services to remodel the Nugget Markets location in both Woodland and Novato Corte, California. The scope included interior improvements and exterior facade renovations to create an upscale European market aesthetic/ while intentionally not identical, the two remodeled locations are unmistakably part of the Nugget family of markets.

Retail

NORR is at the forefront of innovative national and international retail design. We have a proven track record of designing vibrant and commercially viable retail environments that enable product sales and deliver maximum value per square foot. We work in collaboration with major brands to develop a retail experience that embraces consumer trends, technology advances and business imperatives.

Design Expertise Across Retail Types

NORR's retail design expertise provides specialized architecture, interior design and engineering for a variety of retail types. Our experiential designs have been realized in small single-site and multi-location retail and concepts and mixed-use environments, as well as large-scale department and anchor-focused stores and destination shopping centers. We are also actively involved in retrofit, upgrading and renovation projects that focus on maximizing return on investment, always working toward helping reposition the strategically located asset within its marketplace. Our collaborative design process adds value through clarity of project vision, market analysis and a well-defined retail experience through the eyes of the client and retail guests.

Services with Value and Impact

NORR has developed a framework to provide best value in the extremely competitive retail landscape. Every retail project is different and has different requirements. From the initial stages, we can provide essential services including feasibility studies and code audits, existing condition analysis, test fit-ups and prototype design and development. Our dedicated team of retail experts design for renovations, repositionings, rebrands and new builds. Every retail program considers sustainability, accessibility and compliance requirements. This retail framework has proven value and impact for retail projects worldwide.
